

TERRA OPTIMA

The multi-purpose reform tile.

- Exceeds the quality requirements of DIN EN 1304
- First class raw materials and the modern firing process enable the diversity of 10 colours
- Side water drainage and the double side interlock offers optimal moisture protection
- Suitable for roofs from 10° to 90° pitch
- Two robust suspension lugs ensure a secure hold and reliable rear ventilation of the roof battens
- An especially large adjustment range of 51 mm makes them ideal, even on Mansard roofs with short rafters

Note: For this model, a color change was made to the NUANCE copper red. Further information can be found here: [Product range info](#).

TECHNICAL DATA

Size (appr.)	262 x 444 mm
Covering width min. approx.	221 mm
Covering width on av. approx.	222 mm
Max. coverage width (approx.)	223 mm
Min. gauge (approx.)	330/350 mm
Covering length on av. approx.	355 mm
Max. gauge (approx.)	380 mm
Tile requirement min. (approx.)	11.9 pcs/m ²
Average tile requirement (approx.)	12.8 pcs/m ²
Brickware max. approx.	13.7 pcs/m ²
Unit weight (approx.)	3.3 kg/piece
Weight per m ² (approx.)	42.2 kg/m ²
Weight per pallet (approx.)	975 kg
Pcs per mini-pack	6 piece
Pcs per pallet	288 piece

APPLICATIONS

ADDITIONAL MEASURES ACCORDING TO CREATON MANUFACTURER'S SPECIFICATIONS	
Standard roof pitch CREATON DE in combination with additional measures according to manufacturer's specifications Standard roof pitch CREATON DE in combination with additional measures according to manufacturer's specifications	18 °
Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, TRIO extra, QUATTRO longlife extra	≥ 18 °
Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO longlife ND extra	≥ 16 °
Installation of a trussing sheet/glued sub-roof with nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, TRIO extra, QUATTRO longlife extra	≥ 16 °
Installation as a rainproof sub-roof, possible CREATON products: DUO longlife ND extra, TRIO extra, QUATTRO longlife extra	≥ 14 °
Installation as a watertight sub-roof, possible CREATON products: QUATTRO longlife extra	≥ 10 °
Installation as a watertight sub-roof welded in a 7° special solution, please observe separate installation guidelines, possible CREATON products: QUATTRO longlife extra	-

TECHNICAL INFORMATIONS

- With 330 mm > 350 mm gauge, verges must be notched.
- The technical drawing shown is merely an example.
- According to the Central Association of the German Roofing Trade (ZVDH) rules for verge tiles, the distance between the inner edge of the verge lug and the outer edge of the gable wall or cladding must be at least 1 cm.
- Current national rules and standards apply to the execution of roofing work. These vary from country to country (e.g. ZVDH Rules, Austrian Standards) and must be taken into consideration during execution. As manufacturer's information, CREATON-specific information about the execution of the sub-roof is also applicable and is complementary to these. You can find them in our Roof Planner or at www.creaton.de / www.creaton.at.
- Please consider the sample letter for the standard CREATON roof pitches.
