

HEIDELBERG

The Classic

- Traditional timeless shape for new construction and renovation
- Double water traps provide extra protection against rain intrusion
- Rounded lower edge for better water discharge and prevention of edge staining
- Solid support strip at the suspension lug to prevent saturation at the roof batten
- Distinctive bottom ribbing reduces the penetration of drifting snow or driving rain
- High side interlock with joint open to the side provides helps water drain more effectively, reduces strain on the interlock relief and prevents the growth of moss

Installation as a rainproof sub-roof, possible CREATON products: DUO longlife ND extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra	≥14 °
Installation as a watertight sub-roof, possible CREATON products: QUATTRO longlife extra	≥10 °
Installation as a watertight sub-roof welded in a 7° special solution, please observe separate installation guidelines, possible CREATON products: QUATTRO longlife extra	-

TECHNICAL INFORMATIONS

- The technical drawing shown is merely an example.
- According to the Central Association of the German Roofing Trade (ZVDH) rules for verge tiles, the distance between the inner edge of the verge lug and the outer edge of the gable wall or cladding must be at least 1 cm.
- Batten spacing / tile gauge is dependent on the roof pitch.
- Please consider the sample letter for the standard CREATON roof pitches.
- If dust is created by cutting the stones, make sure that any residue created by this must be removed and disposed of immediately.
