

## FUTURA

Seamlessly into the future.

- Generous adjustment range of 29 mm per tile
- 15 captivating colours in four velvety surface finish variants, all from first-class materials
- Seamless coverage and optimum flow behaviour thanks to technically innovative design
- Also suitable for roof pitches as low as 7°, with a waterproof sub-roof
- Labyrinth technology, with five specially-shaped protruding side ribs, prevents rainwater penetration, even in the fiercest storms
- This interlock, the water flow features and especially good cw value make FUTURA an outstanding tile, suitable for very low-pitched and very steep roofs alike

### TECHNICAL DATA

Size (appr.)	300 x 482 mm
Covering width min. approx.	235 mm
Covering width on av. approx.	238 mm
Max. coverage width (approx.)	240 mm
Min. gauge (approx.)	360 mm
Covering length on av. approx.	374 mm
Max. gauge (approx.)	388 mm
Tile requirement min. (approx.)	10.8 pcs/m <sup>2</sup>
Average tile requirement (approx.)	11.3 pcs/m <sup>2</sup>
Brickware max. approx.	11.9 pcs/m <sup>2</sup>
Unit weight (approx.)	3.8 kg/piece
Weight per m <sup>2</sup> (approx.)	42.9 kg/m <sup>2</sup>
Weight per pallet (approx.)	937 kg
Pcs per mini-pack	5 piece
Pcs per pallet	240 piece

## APPLICATIONS

### ADDITIONAL MEASURES ACCORDING TO CREATON MANUFACTURER'S SPECIFICATIONS

Standard roof pitch CREATON DE in combination with additional measures according to manufacturer's specifications	Standard roof pitch CREATON DE in combination with additional measures according to manufacturer's specifications	14 °
Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, DUO longlife PV extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra		≥ 14 °
Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO longlife ND extra		≥ 12 °
Installation of a trussing sheet/glued sub-roof with nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, DUO longlife PV extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra		≥ 12 °
Installation as a rainproof sub-roof, possible CREATON products: DUO longlife ND extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra		≥ 10 °
Installation as a watertight sub-roof, possible CREATON products: QUATTRO longlife extra		≥ 10 °
Installation as a watertight sub-roof welded in a 7° special solution, please observe separate installation guidelines, possible CREATON products: QUATTRO longlife extra		≥ 7 °

## TECHNICAL INFORMATION

- The technical drawing shown is merely an example.
- According to the Central Association of the German Roofing Trade (ZVDH) rules for verge tiles, the distance between the inner edge of the verge lug and the outer edge of the gable wall or cladding must be at least 1 cm.
- Current national rules and standards apply to the execution of roofing work. These vary from country to country (e.g. ZVDH Rules, Austrian Standards) and must be taken into consideration during execution. As manufacturer's information, CREATON-specific information about the execution of the sub-roof is also applicable and is complementary to these. You can find them in our Roof Planner or at [www.creaton.de](http://www.creaton.de) / [www.creaton.at](http://www.creaton.at).
- All roofs with a roof pitch of 7° - 9° require individual approval from CREATON Applications Technology. CREATON manufacturer's regulations must be complied with during installation.
- Please consider the sample letter for the standard CREATON roof pitches.
