

# DOMINO

The linear smooth tile.

- Generous adjustment range of 12 mm per tile
- First-class raw materials ensure exceptional homogeneity with low shrinkage, and the high level of iron oxide creates brilliantly intense authentic colours
- Very pronounced recess shape at the vertical interlock
- Can be used in ancillary buildings with bonded coverage for roof pitches of 25° and above, without additional measures, in accordance with Central Association of the German Roofing Trade (ZVDH) guidelines
- DOMINO has a single vertical interlock. But how! The very pronounced recess shape provides optimum water control, even in the fiercest storms. The stepped overlaps reliably protect against penetration by water and dirt

| Size (appr.)                       | 257 x 436 mm |
|------------------------------------|--------------|
| Covering width min. approx.        | 224 mm       |
| Covering width on av. approx.      | 225 mm       |
| Max. coverage width (approx.)      | 226 mm       |
| Min. gauge (approx.)               | 343 mm       |
| Covering length on av. approx.     | 348 mm       |
| Max. gauge (approx.)               | 354 mm       |
| Tile requirement min. (approx.)    | 12.4 pcs/m²  |
| Average tile requirement (approx.) | 12.7 pcs/m²  |
| Brickware max. approx.             | 13.1 pcs/m²  |
| Unit weight (approx.)              | 4.2 kg/piece |
| Weight per m² (approx.)            | 53.3 kg/m²   |
| Weight per pallet (approx.)        | 1033 kg      |
| Pcs per mini-pack                  | 4 piece      |
| Pcs per pallet                     | 240 piece    |

## TECHNICAL DATA

#### APPLICATIONS

| Standard roof pitch CREATON DE in combination with additional measures according to manufacturer's specificationsStandard 18°   Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, DUO longlife PV extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra ≥ 18°   Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO extra, DUO longlife ND extra ≥ 16°   Installation of a trussing sheet/glued sub-roof without nail seals, possible CREATON products: DUO longlife ND extra ≥ 16°   Installation of a trussing sheet/glued sub-roof with nail seals, possible CREATON products: DUO longlife ND extra, DUO longlife ND extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra ≥ 16°   Installation of a trussing sheet/glued sub-roof with nail seals, possible CREATON products: DUO extra, DUO longlife ND extra, DUO longlife ND extra, TRIO extra, TRIO extra, TRIO longlife extra, QUATTRO longlife extra ≥ 16°   Installation as a rainproof sub-roof, possible CREATON products: DUO longlife ND extra, TRIO longlife extra, QUATTRO longlife extra ≥ 14°   Installation as a watertight sub-roof, possible CREATON products: QUATTRO longlife extra ≥ 10°   Installation as a watertight sub-roof welded in a 7° special solution, please observe separate installation guidelines, possible - | ADDITIONAL MEASURES ACCORDING TO CREATON MANUFACTURER'S SPECIFICATIONS   |        |

### **TECHNICAL INFORMATIONS**

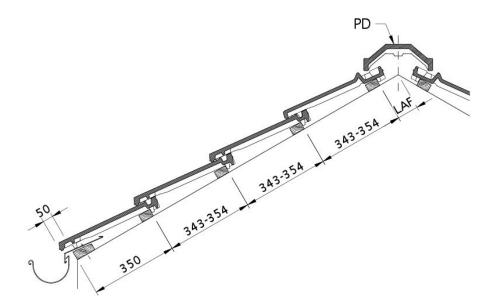

- The technical drawing shown is merely an example.
- According to the Central Association of the German Roofing Trade (ZVDH) rules for verge tiles, the distance between the inner edge of the verge lug and the outer edge of the gable wall or cladding must be at least 1 cm.
- Current national rules and standards apply to the execution of roofing work. These vary from country to country (e.g. ZVDH Rules, Austrian Standards) and must be taken into consideration during execution. As manufacturer's information, CREATON-specific information about the execution of the sub-roof is also applicable and is complementary to these. You can find them in our Roof Planner or at www.creaton.de / www.creaton.at.
- Please consider the sample letter for the standard CREATON roof pitches.
